

Python for Linguists 2023

Quiz for week 5

Name: _____

1. What is the output of the following programme?
2. Does anything go wrong? Can you improve the code?

```
python_students = []
```

```
def enroll_student(python_students, student):  
    ... # let's pretend this function is doing more than just the following:  
    python_students = python_students.append(student)  
    return python_students
```

```
enroll_student(python_students, 'Ali')  
enroll_student(python_students, 'Ana')  
enroll_student(python_students, 'Alf')
```

```
print('Enrolled:', python_students)
```
