

## Python for Linguists 2023

### Quiz for week 4

Name: \_\_\_\_\_

1. What does the following program print (when run from a python file)?
2. Change (only) the `greet` function, so that what it prints will start with a capital letter.

```
def create_greeting(language):  
    if language == 'English':  
        return 'hello'  
    elif language == 'French':  
        return 'bonjour'  
    else:  
        return 'I don\'t speak ' + language
```

```
def greet(language, emotion):  
    greeting = create_greeting(language)  
    if emotion == 'sad':  
        greeting += '...'  
    else:  
        greeting += '!'  
    print(greeting)
```

```
greet('French', 'sad')  
greet('Dutch', 'angry')  
print(create_greeting('English'))  
print(greet('English', 'happy'))
```
